**INDIANA CROP IMPROVEMENT ASSOCIATION
7700 Stockwell Road, Lafayette, Indiana 47909**

**BOARD OF DIRECTORS
(Elected for four year terms)**

One Year Remaining:

MIKE COOMER--Brodbeck Seed, 4070 W 50 N, Wabash 46992-8640
MIKE DAVIS--President, AgVenture D&M, 402 Wilson Street, P.O. Box 102, Kentland 47951
JIM HERR--Beck's Superior Hybrids Inc., 6767 E. 276th Street, Atlanta 46031

Two Years Remaining:

BOB BISCHOFF-- (ISTA Representative) Incotec, 415 E. Columbine Lane, Westfield 46074
CARLOS IGLESIAS--Weaver Popcorn Company, 9321 N. New Richmond Rd., New Richmond 46967
GREG SMITH--Vice-President, Hubner Industries LLC., 10280 W. State Road 28, West Lebanon 47991-8064

Three Years Remaining:

AARON CONAWAY--Director at Large, Total Seed Production, 1375 N. 800 W., Tipton 46072-8609
CHRIS GOETZ--Wyckoff Hybrids, 594 E. 400 N., Valparaiso 46383
WADE WILEY--Beck's Superior Hybrids, 6767 E. 276th Street, Atlanta 46031

Four Years Remaining

CRAIG ANDERSON--AgReliant Genetics, 1122 East 169th Street, Westfield 46074
BRYAN GERARD--JGL, Inc. 1550 Pidco Drive, Plymouth 46563-7800
STEVE ROSWARSKI--Ag Printers, 2880 U.S. 231 South, Ste. 200, Lafayette 47909

Ex-officio Voting Members:

DR. JOSEPH ANDERSON-- Dept. of Agronomy, Purdue, Lilly Hall, 915 W. State St., West Lafayette 47907-2054
DR. PETER GOLDSBROUGH--Botany & Plant Path., Purdue, Lilly Hall, 915 W. State St., West Lafayette 47907-2054
DR. MARSHALL MARTIN--College of Agriculture, Purdue, 1140 Ag Admin. Bldg., West Lafayette 47907-2054
BEN KAEHLER--Immediate Past President, Dow AgroSciences, 9330 Zionsville Road, Indianapolis 46268

ICIA STAFF

Larry Svajgr--Executive Director
Alan Galbreth--Associate Director
Joe Deford--Field Programs Director
Susan Overdorf--Administrative Assistant
Susan Dadacz--Seed Lab Records/Field Programs
Emily Dierking, Ph.D.--Genetics Lab Program Director
Dan Edwards--Cold Testing & Source ID Programs
Kris Ellingwood--Finance Director/HR
Fred Halsema--Warm Germination & Tag Printing
Karen Miller--Genetics Lab Technician/Elisa Testing
Kevin Seward, R.S.T.--Seed Lab Supervisor
Rachael Sondeno--Genetics Lab Technician/PCR Testing
Yuejin Weng --Ph.D. Genetics Lab, PCR Testing
Aaron Whalen--Assisant Field Programs Director/Bioassay Testing

Notice to Buyer: **Exclusion of Warranties and Limitations of Damages.**

Seed bearing authorized Indiana Certification labels have only met the minimum requirements outlined in the "Indiana Seed Certification Standards Handbook."

Seed Certification relies upon samples and records provided by member/applicants which are beyond the control of the certifying agency, (Indiana Crop Improvement Association).

Therefore, Indiana Crop Improvement Association makes no warranties, express or implied, including warranty of merchantability, or fitness for a particular purpose concerning certified seed and hereby expressly disclaims the same.

In no event shall Indiana Crop Improvement Association be responsible for damages, actual, incidental or consequential, regarding certified seed provided by applicant/members and/or vendors.

SOURCES OF CERTIFIED SEED

The growers with listings of certified seed in this directory have only applied for certification of their seed. Final certification will not be completed until cleaned samples have been laboratory inspected and approved by Certification.

Address correspondence pertaining to Certification to:
Indiana Crop Improvement Association
7700 Stockwell Road
Lafayette, IN 47909
Phone: 765-523-2535
Fax: 765-523-2536
E-mail: icia@indianacrop.org
Web address: www.indianacrop.org

The purpose of this booklet is to provide farmers and seedsmen with a handy reference of sources of certified seed **for 2011 planting.**

SEED CERTIFICATION

Seed is CERTIFIED by Indiana Crop Improvement Association after field and laboratory inspections have been completed according to the standards and rules for certification as approved by the Purdue University Office of Agricultural Research Programs under the law governing seed certification in Indiana.

All purchases of certified seed are to be made directly from growers listed in this directory. It is the growers' responsibility to supply seed representative of the seed submitted and approved for certification by the Certification Office. It is recommended that the buyer examine the seed and the analysis tag for all seed purchased. **ALL SEED SOLD AS CERTIFIED SEED MUST HAVE AN OFFICIAL CERTIFIED TAG ATTACHED OR IT IS NOT CERTIFIED.** The Association does not guarantee seed purchased; however, seed purchased or delivered not meeting certification standards should be brought to the attention of the director of the Association.

WHEAT

Branson

Branson is a soft, red, winter wheat developed by AgriPro Wheat. It is a medium height, semidwarf variety with good straw strength. Plant color at boot stage is dark green. Flag leaf at boot stage is erect and twisted. Waxy bloom is present on the head, stem, and flag leaf sheath. Anther color is yellow. Head shape is strap, mid-dense and awnleted. Glumes are glabrous, narrow in width and long in length with oblique shoulders and obtuse beaks. It is moderately resistant to septoria leaf blotch, stripe rust and powdery mildew and has intermediate resistance to soilborne mosaic virus and leaf rust. It is described with up to 0.8% variants.

Branson is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act.

Roane

Roane is a soft, red, winter wheat developed and released by the Virginia Ag Experiment Station. It is a full season variety with medium height. Plant color at booting is blue-green. The flag leaf is recurved and twisted. It is resistant to the prevalent field populations of powdery mildew. It also has intermediate resistance to soilborne mosaic and wheat spindle streak mosaic viruses as well as leaf and glume blotch. It possesses a moderate level of resistance to scab. It is resistant to Hessian fly biotypes GP, B, C and E.

Roane is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed. There is no registered class of seed.

SUNBURST

Sunburst is a soft, red winter wheat developed by the Sunbeam Extract Company. Sunburst is intended for the general purpose wheat market. Leaf color at booting is blue-green and the flag leaf is erect, twisted and has no waxy bloom. Anther color is yellow. Spikes are awnless, mid-dense, tapering in shape and inclined at maturity. Sunburst is resistant to powdery mildew, moderately resistant to stem rust and moderately susceptible to leaf rust. It has good scab resistance and is resistant to leaf stripe rust. It is susceptible to Hessian fly. Up to 1.0% variant plants are allowed.

Sunburst is protected under the Title V Certifica-

tion Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

25R34

25R34 is a soft, red, winter wheat developed by Pioneer Hi-Bred International. Leaf color at booting is green and the flag leaf has a waxy bloom. Anther color is yellow. Spikes are awned, mid-dense, tapering in shape and included at maturity. Glume color is white/amber. 25R34 exhibits very good stripe rust resistance and good resistance to fungal leaf blights, leaf rust and soilborne mosaic virus. It has resistance to biotype L of Hessian fly from the H13 resistance gene.

25R34 is protected under the 1994 Plant Variety Protection Act.

25R39

25R39 is a soft, red, winter wheat developed by Pioneer Hi-Bred International. Leaf color at booting is green and the flag leaf is recurved, twisted and has a waxy bloom. Anther color is yellow. Spikes are apically awnletted, lax, tapering in shape and inclined at maturity. The seed shape tends to be elliptical. 25R39 has shown very good winter hardiness and resistance to straw lodging. It has excellent resistance to leaf rust and stripe rust and moderate resistance to powdery mildew. It has also shown moderate resistance to the complex of fungal organisms that incite leaf blights.

25R39 is protected under the 1994 Plant Variety Protection Act.

25R40

25R40 is a soft, red, winter wheat developed by Pioneer Hi-Bred International. Leaf color at booting is green and the flag leaf has a waxy bloom. Anther color is purple. Spikes are awned, mid-dense, tapering in shape and inclined at maturity. Glume color is white/amber. 25R40 has shown very good leaf rust resistance, stripe rust resistance and powdery mildew resistance. It exhibits good resistance levels to fungal leaf blights, soil-borne mosaic virus and wheat spindle streak mosaic virus. 25R40 is protected under the 1994 Plant Variety Protection Act.

25R47

25R47 is a soft, red, winter wheat developed by Pioneer Hi-Bred International. Leaf color at boot stage is green and the flag leaf is erect, twisted and has no waxy bloom. Anther color is purple. Heads are awned, mid-dense, short to mid-long, tapering in shape and nodding at maturity. 25R47 has excellent resistance to the prevalent races of powdery mildew and leaf rust in the Corn Belt. It

has very good resistance to septoria tritici, nodorum leaf blotch and tan spot. It also has good resistance to soil-borne and wheat spindle streak mosaic viruses. Variants are limited to not more than 1/15,000 in total and may include taller or awnless plants.

25R47 is protected under the 1994 Plant Variety Protection Act.

25R56

25R56 is a soft, red, winter wheat developed by Pioneer Hi-Bred International. Leaf color at booting is green and the flag leaf is erect, twisted and has a waxy bloom. Anther color is yellow. Spikes are apically awnletted, mid-dense and tapering in shape and nodding at maturity. 25R56 has shown excellent resistance to stripe rust in the mid-south U.S. region and very good resistance to leaf rust in the northern Corn Belt. It is moderately resistant to the complex of organisms that incite leaf blights including septoria tritici blotch, stagonospora nodorum leaf blotch and tan spot. It has intermediate resistance to prevalent races of powdery mildew and to wheat spindle streak and mosaic virus and to soilborne mosaic virus. It has also shown resistance to Hessian fly biotype L.

25R56 is protected under the 1994 Plant Variety Protection Act.

W1104

W1104 is a soft, red, winter wheat developed by Syngenta Seeds, Inc. It is a relatively short semidwarf variety with medium maturity. Leaf color at booting is green and the flag leaf is erect, twisted and has a waxy bloom. Anther color is yellow. Spikes are apically awnlette, mid-dense, oblong in shape and inclined at maturity. It has shown moderate resistance to the current races of leaf rust in OH, KY, and TN. Up to 1.0% variant plants may be encountered.

W1104 is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

W1377

W1377 is a soft, red, winter wheat bred and developed by AgriPro for grain production. W1377 is a medium-tall height wheat that has shown tolerance to the stripe rust field races prevalent in 2005. This variety has shown intermediate reaction to leaf rust field races prevalent in the Midwest and upper mid-southern U.S. in 2004, 2005 and 2006. W1377 has shown intermediate reaction to Fusarium head scab, susceptibility to powdery mildew in Michigan and in the East and has shown resistance to Biotypes B and E of Hessian fly. W1377 results in excellent test weight wheat. This variety is adapted to most of the Midwestern and upper mid-southern soft wheat areas. Breeder seed will be maintained by AgriPro and

generations of seed to be multiplied will be Breeder, Foundation, Registered and Certified.

W1377 is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

W1566

W1566 is a soft, red, winter wheat developed by Syngenta Seeds, Inc. It is a relatively tall semidwarf variety with medium maturity. Leaf color at booting is green and the flag leaf is recurved, twisted and has a waxy bloom. Anther color is yellow. Spikes are awnletted, mid-dense, tapering in shape and inclined at maturity. It has shown resistance to the current field races of powdery mildew. It is moderately susceptible to current field races of leaf rust and soil virus complex. It is susceptible to most biotypes of Hessian fly. Up to 1.0% variant plants may be encountered.

W1566 is protected under the Title V Certification Option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

PLANT VARIETY PROTECTION ACT

The developer of a new distinct variety may obtain protection (essentially a patent) for that variety if they choose to do so, provided the variety meets the requirements of the Plant Variety Protection Act of 1970 and amended 1994. Two options for plant variety protection are available to the developer of the variety.

Under the first option, the developer of the variety or their agent may sell either certified or non-certified seed of the variety. If the developer of the variety has reason to believe that anyone is infringing on their rights, they may resort to civil action.

The other option ("certification option") for protecting a variety utilizes the provisions of Title V of the Federal Seed Act. A variety protected in this manner may be sold by variety name only as a class of certified seed.

It is the responsibility of the seller to inform the buyer if the variety is protected. Each container of seed sold should be labeled with a tag indicating the type of protection for which the owner has applied. Under the second option, the label will state: "Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only as a Class of Certified Seed - U.S. Protected Variety."

In Indiana, the proper statement is preprinted directly on the face of every certified seed tag used on seed of varieties protected under the "certification option."

VARIETIES ELIGIBLE FOR CERTIFICATION IN INDIANA

All crop varieties certified annually by the association are listed and described in the Summer and Winter editions of the Indiana Seed Directory.

As new varieties are released and as older varieties fade from the scene, the total list of eligible varieties becomes rather long and somewhat meaningless.

Any questions relating to the eligibility of a specific crop variety for certification should be directed to Indiana Crop Improvement Association. A complete list of all varieties certified in recent years is maintained.

**ICIA
QUALITY ASSURANCE
PROGRAM**

Field inspected and laboratory tested
by the Seed Improvement Agency
in the State of Origin

The following companies have produced seed under the Quality Assurance Program. This program provides an unbiased quality control system of field inspection, laboratory testing and post-season growout testing for varieties, brands, and blends.

Seed carrying the "ICIA Inspected" green tag has met the minimum genetic standard of not more than .10% off-type plants or seeds based upon the breeder's agronomic description.

Participation in this program illustrates these companies' efforts to use effective quality control in seed production, conditioning and marketing. The services and records generated under this system provide quality assurance for every customer.

For more information regarding specific products produced using the QA Program in 2009, please contact the participating company.

**NOXIOUS WEED SEED FREE FORAGE AND
MULCH CERTIFICATION**

There is a growing demand in North America for the use of certified noxious weed seed free forage and mulch as a preventative program to limit the spread of noxious weeds. This voluntary certification program is designed to assure that forage (hay, cubes and pellets) and mulch sold with proper certification identification meets minimum standards designed to limit the spread of noxious weeds. Buyers are provided assurance that forage and mulch certified through this program meets these minimum standards.

The Indiana Crop Improvement Association has been designated as the official Noxious Weed Seed Free Forage and Mulch Certification Agency in Indiana by the Director of Purdue Agricultural Research Programs in consultation with the Indiana State Chemist Office. Program standards comply with the Regional Weed Free Forage Certification Standards developed by the Regional Weed Free Forage Committee of the North American Weed Management Association. The Regional Weed Free Forage Committee has established minimum standards to allow uniform participation by states and provinces in the program. Forage and mulch certified under the ICIA certification program with proper certification markings attached will be eligible to be shipped into restricted areas in the United States and Canada where only forage and mulch certified under the Regional Forage Certification Standards can be used.

The following producers have applied for certification of noxious weed seed free forage and/or mulch:

STRAW

Cardinal Farms

2276 East Cardinal Road
Oaktown 47561

812/745-4493

Donald Conner

10411 N Division Road
Fountaintown 46130

317/861-5891

FOUNDATION SEED AVAILABILITY LIST

For information regarding foundation seed for the public, certified, named varieties and the publicly developed varieties for brand labeling, contact:

Agricultural Alumni Seed Improvement Association

702 SR 28 East
PO Box 158

Romney, Indiana 47981

Telephone: (765) 538-3145

(800) 822-7134

IMPORTANT

For several years, Indiana Crop Improvement Association has attempted to provide a list of crop varieties protected under the U.S. Plant Variety Protection Act. As more and more varieties are developed and protected, it becomes nearly impossible for us to include a list which would cover all varieties of all crops under protection in the U.S. Therefore, the list we provide will specifically include:

- 1) Those varieties of crops protected under Title V (certification option) that are being produced in Indiana
- 2) Those varieties that are protected without Title V (certification option) that are being certified in Indiana.

We are not listing protected varieties that do not use certification in Indiana, nor some that are protected under Title V (certification option) that are not being produced in Indiana.

A complete listing of all protected varieties is available in the "Official Journal of the Plant Variety Protection Office" which may be obtained free upon request from:

Plant Variety Protection Office
10301 Baltimore Blvd.
National Agriculture Library, Room 401
Beltsville, Maryland 20705-2351
Phone: 301-504-5518 Fax: 301-504-5291

Following is the list of varieties we are providing using the above criteria:

**CROPS ELIGIBLE FOR CERTIFICATION
