BOARD OF DIRECTORS
(Elected for four year terms)

One Year Remaining:

MATT NICE--Director at Large, Thurston Genetics, 302 E. Market Street, Crawfordsville 47933
DAVID PEARL--President, Dave Pearl Consulting, 7126 Oakbay Drive, Noblesville 46062
JILL ZELLER--Dow AgroSciences, 9330 Zionsville Road, Indianapolis 46268

Two Years Remaining:

BEN GREEN--Purple Ribbon Seeds, PO Box 221, Marshall 47859
BARRY JOHNSON--MBS Genetics, 11605 N CR 25 W, Farmersburg 47850
DAN ROWLAND--Greenleaf Genetics/Syngenta Seedcare, 8986 W. 900 S. South Whitley 46787

Three Years Remaining:

JASON MOREHOUSE--Vice President, Beck's Hybrids, 6767 E 276th St, Atlanta 46031
JOHN STURGES-- Bayer Crop Science, 15849 S US 231, Remington 47977
MARVIN WIEDERHOLD-- Tate & Lyle, 2245 Sagamore Pkwy N, Lafayette 47904

Four Years Remaining:

SAMANTHA BOCK-- Inari Agriculture, 1281 Win Hentschel Blvd Suite W1108, West Lafayette 47906
TROY GINTHER-- AgReliant Genetics, 1122 E 169th St, Westfield 46074
AARON WHALEN-- Ag Alumni Seed, 702 State Road 28 East, PO Box 158, Romney 47981

Ex-officio Voting Members:

DR. MARSHALL MARTIN--College of Agriculture, Purdue, 1140 Ag Admin. Bldg., West Lafayette 47907
CHUCK SCHNEIDER--Immediate Past President, AgVenture Inc., 1010 Roanoke Drive, Westfield 46074
DR. CHRIS STAIGER--Botany & Plant Path., Purdue, Lilly Hall, 915 W. State St., West Lafayette 47907-2054
DR. RON TURCO-- Dept. of Agronomy, Purdue, Lilly Hall, 915 W. State St., West Lafayette 47907

ICIA STAFF

James Fung--Chief Executive Officer
Joe Deford--Chief Operating Officer
Randy Barger--Information Technology Manager
Matheus Benatti, Ph.D.--Genetics Lab Director
James Bonick--Warm Germination Department
Penny Carey--Bioassay Department Head
Susan Dadacz--Sample Data Department Head
Daniel Heiss--Soybean Field Programs
Karen Laffoon--Cold Test Director
Thomas Mager--Registered Seed Technologist
Srilakshmi Makkena, Ph.D.--Research Scientist
Justin Milcarek--Marketing Director
Karen Miller, CGT--Genetics Lab Technician/Elisa Testing
Susan Overdorf--Executive Assistant/Event Development
Kevin Seward, RST--Seed Lab Director
Rachael Sondeno, RGT--Genetics Lab Technician/PCR Testing
Zach Sparks--Corn Field Programs
Gil Waibel, RST--Native Seed Program Director
Jayne Wolff--Bookkeeper

SEED CERTIFICATION

Seed is CERTIFIED by Indiana Crop Improvement Association after field and laboratory inspections have been completed according to the standards and rules for certification as approved by the Purdue University Office of Agricultural Research Programs under the law governing seed certification in Indiana.

All purchases of certified seed are to be made directly from growers listed in this directory. It is the growers' responsibility to supply seed representative of the seed submitted and approved for certification by the Certification Office. It is recommended that the buyer examine the seed and the analysis tag for all seed purchased. ALL SEED SOLD AS CERTIFIED SEED MUST HAVE AN OFFICIAL CERTIFIED TAG ATTACHED OR IT IS NOT CERTIFIED. The Association does not guarantee seed purchased; however, seed purchased or delivered not meeting certification standards should be brought to the attention of the Association.

Notice to Buyer:
Exclusion of Warranties and
Limitations of Damages.

Seed bearing authorized Indiana Certification labels have only met the minimum requirements outlined in the "Indiana Seed Certification Standards Handbook."

Seed Certification relies upon samples and records provided by member/applicants which are beyond the control of the certifying agency, (Indiana Crop Improvement Association).

Therefore, Indiana Crop Improvement Association makes no warranties, express or implied, including warranty of merchantability, or fitness for a particular purpose concerning certified seed and hereby expressly disclaims the same.

In no event shall Indiana Crop Improvement Association be responsible for damages, actual, incidental or consequential, regarding certified seed provided by applicant/members and/or vendors.

SOURCES OF CERTIFIED SEED

The growers with listings of certified seed in this directory have only applied for certification of their seed. Final certification will not be completed until cleaned samples have been laboratory inspected and approved by Certification.

Address correspondence pertaining to Certification to:

WHEAT

SUNBURST

Sunburst is a soft, red, winter wheat developed by the Sunbeam Extract Company. Sunburst is intended for the general purpose wheat market. Leaf color at booting is blue-green and the flag is erect, twisted and has no waxy bloom. Another color is yellow. Spikes are awnless, mid-dense, tapering in shape and inclined at maturity. Sunburst is resistant to powdery mildew, moderately resistant to stem rust and moderately susceptible to leaf rust. It has good scab resistance and is resistant to leaf stripe rust. It is susceptible to hessian fly. Up to 1.0% variant plants are allowed. Sunburst is protected under the Title V certification option of the 1994 Plant Variety Protection Act and may be sold by variety name only as a class of certified seed.

25R40

25R40 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf has a waxy bloom. Another color is purple. Spikes are awned, mid-dense, tapering in shape and inclined at maturity. Glume color is white/amber. 25R40 has shown very good leaf rust resistance, stripe rust resistance and powdery mildew resistance. It exhibits good resistance levels to fungal leaf blights, soil-borne mosaic virus and wheat spindle streak mosaic virus. 25R40 is protected under the 1994 Plant Variety Protection Act.

25R46

25R46 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf is recurved, twisted and has a waxy bloom. Another color is purple. Heads are awned, mid-dense, tapering in shape and erect at maturity. Glume color is tan. 25R46 has very good straw lodging resistance and strong fusarium head blight resistance. It also has very good wheat soil borne mosaic virus and spindle streak mosaic virus resistance. 25R46 is protected under the 1994 Plant Variety Protection Act.

25R61

25R61 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is green and the flag leaf is erect, twisted and has a waxy bloom. Another color is yellow. Spikes are awned, dense, tapering in shape and nodding at maturity. 25R61 has shown strong resistance to leaf rust and very good resistance to Fusarium head blight (scab), powdery mildew and soil-borne mosaic virus. Awnless and/or taller plants may occur at a frequency up to 0.1%. Application for protection under the 1994 Plant Variety Protection act is anticipated.

25R74

25R74 is a soft, red, winter wheat developed by DuPont Pioneer. Leaf color at booting is yellow-green and the flag leaf is erect, twisted and has a waxy bloom. Another color is yellow. Spikes are awned, lax, oblong in shape and nodding at maturity. Glume color is white/amber. 25R74 has shown high resistance to powdery mildew and stripe rust. It has shown intermediate resistance to Fusarium head blight (scab), leaf rust and soil-borne mosaic virus. Awnless plants may occur at a frequency up to 0.5%. Application for protection under the 1994 Plant Variety Protection act is anticipated.

PLANT VARIETY PROTECTION ACT

The developer of a new distinct variety may obtain protection (essentially a patent) for that variety if they choose to do so, provided the variety meets the requirements of the Plant Variety Protection Act of 1970 and amended 1994. Two options for plant variety protection are available to the developer of the variety.

Under the first option, the developer of the variety or their agent may sell either certified or non-certified seed of the variety. If the developer of the variety has reason to believe that anyone is infringing on their rights, they may resort to civil action. The other option (certification option) for protecting a variety utilizes the provisions of Title V of the Federal Seed Act. A variety protected in this manner may be sold by variety name only as a class of certified seed.

It is the responsibility of the seller to inform the buyer if the variety is protected. Each container of seed that is sold should be labeled with a tag indicating the type of protection for which the owner has applied. Under the second option, the label will state: "Unauthorized Propagation Prohibited - To Be Sold By Variety Name Only as a Class of Certified Seed - U.S. Protected Variety."

In Indiana, the proper statement is preprinted directly on the face of every certified seed tag used on seed of varieties protected under the "certification option."

VARIETIES ELIGIBLE FOR CERTIFICATION IN INDIANA

All crop varieties certified annually by the association are listed and described in the Summer and Winter editions of the Indiana Seed Directory.

As new varieties are released and as older varieties fade from the scene, the total list of eligible varieties becomes rather long and somewhat meaningless.

Any questions relating to the eligibility of a specific crop variety for certification should be directed to Indiana Crop Improvement Association. A complete list of all varieties certified in recent years is maintained.

ICIA QUALITY ASSURANCE PROGRAM

Field inspected and laboratory tested
by the Seed Improvement Agency
in the State of Origin

The following companies have produced seed under the Quality Assurance Program. This program provides an unbiased quality control system of field inspection, laboratory testing and post-season growth testing for varieties, brands, and blends.

Seed carrying the "ICIA Inspected" green tag has met the minimum genetic standard of not more than .50% off-type plants or seeds based upon the breeder's agronomic description.

Participation in this program illustrates these companies' efforts to use effective quality control in seed production, conditioning and marketing. The services and records generated under this system provide quality assurance for every customer.

For more information regarding specific products produced using the QA Program in 2020, please contact the participating company.

**NOXIOUS WEED SEED FREE FORAGE AND
MULCH CERTIFICATION**

There is a growing demand in North America for the use of certified noxious weed seed free forage and mulch as a preventive program to limit the spread of noxious weeds. This voluntary certification program is designed to assure that forage (hay, cubes and pellets) and mulch sold with proper certification identification meets minimum standards designed to limit the spread of noxious weeds. Buyers are provided assurance that forage and mulch certified through this program meets these minimum standards.

The Indiana Crop Improvement Association has been designated as the official Noxious Weed Seed Free Forage and Mulch Certification Agency in Indiana by the Director of Purdue Agricultural Research Programs in consultation with the Indiana State Chemist Office. Program standards comply with the Regional Weed Free Forage Certification Standards developed by the Regional Weed Free Forage Committee of the North American Weed Management Association. The Regional Weed Free Forage Committee has established minimum standards to allow uniform participation by states and provinces in the program. Forage and mulch certified under the ICIA certification program with proper certification markings attached will be eligible to be shipped into restricted areas in the United States and Canada where only forage and mulch certified under the Regional Forage Certification Standards can be used.

IMPORTANT

For several years, Indiana Crop Improvement Association has attempted to provide a list of crop varieties protected under the U.S. Plant Variety Protection Act. As more and more varieties are developed and protected, it becomes nearly impossible for us to include a list which would cover all varieties of all crops under protection in the U.S. Therefore, the list we provide will specifically include:

1. Those varieties of crops protected under Title V Certification Option that are being produced in Indiana.
2. Those varieties that are protected without Title V Certification Option that are being certified in Indiana. We are not listing protected varieties that do not use certification in Indiana, nor some that are protected under Title V (certification option) that are not being produced in Indiana.

A complete listing of all protected varieties is available in the "Official Journal of the Plant Variety Protection Office" which may be obtained free upon request from:

Plant Variety Protection Office
10301 Baltimore Blvd.
National Agriculture Library, Room 401
Beltsville, Maryland 20705-2351
Phone: 301-504-5518 Fax: 301-504-5291

The following is a list of varieties we are providing using the above criteria.
