Seed Directory
For Spring Seeded Crops
Winter 2018

Listing of Seed Producers for:

Corn
Oats
Soybeans

Directory Includes Active & Associate Members, Approved Conditioners, Source Identified Producers
Merritt Hall Insurance provides the most cost effective, comprehensive risk management programs available. With our convenient One-Stop-Shop, we can fulfill your needs with a single phone call!

Dedicated to creative and innovative turn-key solutions, Merritt Hall is an Independent insurance agency, offering the following risk management products:

- Property and Casualty Insurance
- Seedmen’s Errors and Omissions
- Multi-Peril Crop Insurance
- Crop Hall Coverage
- Named Peril Coverage
- Employee Benefits

THE FIRST...

- to design a policy to cover seed corn in 1979.
- to write a commercial insurance package policy specifically for the seedsmen.
- to design the Seedmen’s Error and Omissions Policy.
- to work with both insurance and Seed industries to provide risk management tools that fit.

20 Plus Years Seed Industry Experience and Dedication

Why settle for second?

Notice to Buyer: Exclusion of Warranties and Limitations of Damages.

Seed bearing authorized Indiana Certification labels have only met the minimum requirements outlined in the “Indiana Seed Certification Standards Handbook.” Seed Certification relies upon samples and records provided by member/applicants which are beyond the control of the certifying agency, the Indiana Crop Improvement Association.

Therefore, the Indiana Crop Improvement Association makes no warranties, express or implied, including warranty of merchantability, or fitness for a particular purpose concerning certified seed and hereby expressly disclaims the same.

In no event shall the Indiana Crop Improvement Association be responsible for damages, actual, incidental or consequential, regarding certified seed provided by applicant/members and/or vendors.

SOURCES OF CERTIFIED SEED

The growers with listings of certified seed in this directory have only applied for certification of their seed. Final certification will not be completed until cleaned samples have been laboratory inspected and approved by Certification.

Address correspondence pertaining to Certification:

SEED CERTIFICATION
Seed is CERTIFIED by the Indiana Crop Improvement Association after field and laboratory inspections have been completed according to the standards and rules for certification as approved by the Purdue University Office of Agricultural Research Programs under the law governing seed certification in Indiana.

All purchases of certified seed are to be made directly from growers listed in this directory and it is the growers responsibility to supply seed representative of the seed submitted and approved for certification by the Certification Office. It is recommended that the buyer examine the seed and the analysis tag for all seed purchased. ALL SEED SOLD AS CERTIFIED SEED MUST HAVE AN OFFICIAL CERTIFIED TAG ATTACHED OR IT IS NOT CERTIFIED. The Association does not guarantee seed purchased; however, seed purchased or delivered not meeting certification standards should be brought to the attention of the of the Association.

VARIETIES ELIGIBLE FOR CERTIFICATION IN INDIANA
All crop varieties certified annually by the association are listed and described in the Summer and Winter editions of the Indiana Seed Directory. As new varieties are released and older varieties fade from the scene, the total list of eligible varieties becomes rather long and somewhat meaningless. Any questions relating to the eligibility of a specific crop variety for certification should be directed to the Indiana Crop Improvement Association. A complete list of all varieties certified in recent years is maintained.
MEMBERSHIP FEES
Active Membership with certification .................. $500.00
Active Membership (one time) ........................... 250.00
Associate (per year) ........................................... 50.00

LABELING FEES
Labeling fees vary tremendously because of many options, i.e., some companies print certification tags on site. The prices for those printed by the Association are listed below.

**Corn**
Domestic Certification per tag price .................. $.15
OECD card stock per tag ................................. .18
Pressure sensitive labels for OECD .................. . 20

**Small Grains and Soybeans**
Domestic certification price per tag with analysis data ................................. $ .15
Domestic certification price per tag without analysis data ................................. . 11
OECD tags with analysis data ............................. 18
Pressure sensitive OECD labels .......................... 20

**All Crops**
Bulk Retail Sales for all bushels covered by bulk retail sales certificates (price per bushel) .......... $.02
Price per transfer certificate for bulk transfer .... 3.00

Note: There is a $5.00 minimum tag/label fee per lot.

LABORATORY AND TESTING FEES
The Indiana Crop Improvement Association, Inc. laboratory provides many services for the seed industry. Services are available only to bona-fide seed producers. No testing is provided for farmers’ bin-run grain. Seed companies not actively certifying seed may join ICIA as active or associate members to receive testing services. The following schedule lists the current fees for various tests and services:

**Warm Germination Test**
Corn .......................................................... $12.50
Cotton ...................................................... 12.50
Small Grains .............................................. 12.50
Small Seeds .............................................. 15.50
Sorghum .................................................. 12.50
Soybeans ............................................... 12.50
Sunflowers ................................................ 12.50
Turf Grasses .......................................... 16.50
Native, Reclamation, Wildflowers, etc. ............. Varies*

Sand Germination
Corn..........................................................$23.00
Soybeans......................................................20.50

Cold Germination Test
$14.50

Saturated Cold Test
$22.50

Accelerated Aging Test
$15.00

Tetrazolium Test
Corn..........................................................$27.00

VIP3A.................................................................$47.50
(VIP3A, Duracade® or DroughtGard®).......................$95.00

For more detailed information about individual tests, crops not listed, or how testing can assist in a seed quality control program, contact the ICIA office.
PLANT VARIETY PROTECTION ACT

The developer of a new distinct variety may obtain protection (essentially a patent) for that variety if he chooses to do so, provided the variety meets the requirements of the Plant Variety Protection Act of 1970 and amended 1994. Two options for plant variety protection are available to the developer of the variety.

Under the first option, the developer of the variety or his agent may sell either certified or non-certified seed of the variety. If the developer of the variety has reason to believe that anyone is infringing on his rights, he may resort to civil action.

The other option (“certification option”) for protecting a variety utilizes the provisions of Title V of the Federal Seed Act. A variety protected in this manner may be sold by variety name only as a class of certified seed.

It is the responsibility of the seller to inform the buyer if the variety is protected. Each container of seed sold should be labeled with a tag indicating the type of protection for which the owner has applied. Under the first option, the label will state: “Unauthorized Propagation Prohibited - U.S. Protected Variety.”

Under the certification option, the label will state: “Unauthorized Propagation Prohibited - TO BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SEED - U.S. Protected Variety.”

In Indiana, the proper statement is preprinted directly on the face of every certified seed tag used on seed of varieties protected under the “certification option.”

IMPORTANT

For several years, the Indiana Crop Improvement Association has attempted to provide a list of crop varieties protected under the U.S. Plant Variety Protection Act.

As more and more varieties are developed and protected, it becomes nearly impossible for us to include a list which would cover all varieties of all crops under protection in the U.S.

Therefore, the list we provide will specifically include:

1) Those varieties of crops protected under the Title V (certification option) that are being produced in Indiana and

2) Those varieties that are protected without Title V (certification option) that are being certified in Indiana.

We are not listing protected varieties that do not use certification in Indiana, nor some that are protected under Title V (certification option) that are not being produced in Indiana.

A complete listing of all protected varieties is available in the “Official Journal of the Plant Variety Protection Office” which may be obtained free upon request from:

Plant Variety Protection Office
1400 Independence Avenue, S.W., Rm. 4512 - South Bldg., Mail Stop 0274
Washington, DC 20250-0274
Phone: 202/260-8983  Fax: 202/260-8976

Following is the list of varieties we are providing using the above criteria:

VARIETIES CURRENTLY CERTIFIED IN INDIANA

Native Grasses and Forbs Pre-Variety Certification

This voluntary certification program is designed to assure that the proper identity of native grasses and forbs reproductive material is maintained through all phases of production. The term “reproductive material” refers to all forms of reproductive material including seed, seedlings, cuttings, rooted cuttings, transplants or other forms.

Certification helps assure that any particular set of reproductive material is what is labeled. Certification does not guarantee the physiological quality of the material (e.g., germination rate of a seedlot). Certification also does not guarantee the performance of any given set of reproductive material. Purchasers will still need to match the appropriate species/seed source/variety to the intended planting site.

Source Identified Material (Yellow Tag) - Source identified material is comprised of the least selected germplasm and is considered to be relatively genetically diverse. Source identified material can be produced in natural stands or seed production fields where no selection or selective breeding of the parent population has been made.

The identified source (genetic origin) must be some definable geographic region from which the germplasm was first collected. The source may be relatively broad, resulting from a blend of more than one collection across a region, or it may be narrow, from a single collection location. The precision of the source claimed is the choice of the producers. However, the source must be accurately described. Collection sites are verified by certification agency personnel.

Indiana Crop Improvement Association’s Quality Assurance (QA) program provides a uniform, unbiased quality control system & marketing tool for crop seed marketed as brands, varieties or hybrids not using traditional certification.

The QA program adds significant value to seed programs by maintaining product purity & identity and is readily customized to meet the needs of the customer.

ICIA’s Identity Preserved™ (IP) Program complies with the general IP guidelines for certified products adopted and maintained by the Association of Official Seed Certifying Agencies (AOSCA).

The key to this program is the flexibility to develop a plan to fit the exact needs of the customer.

For more information contact us at: 866.899.2518 or icia@indianacrop.org
